

Role: Software Engineer / QA Engineer/ Business Analyst.

Location: Vadodara

Overview

NetWeb has provided innovative products and reliable professional services to business enterprises around the globe for past 28 years. The company has built up a core competence in creating and deploying cost-effective capability using an offshore-centric business model. The company's offices are based in Florida, USA, Swindon, UK, and Vadodara, India. We have professional associates in Australia, Middle East, Turkey, & Netherlands. Our competitive advantages include a pool of highly competent professionals, a strong management team, strategic offshore location, an ISO-9001:2015 and ISO 27001:2013 certified Quality Management System and over 28 years of successful performance. NetWeb is committed to long-term customer relationships.

We are experts in innovating, developing, maintaining, transforming enterprise solutions, integrations with next-gen technologies.

Objective of Campus Drive:

NetWeb's team is looking for strong, innovative engineers to help lead and enhance NetWeb's next generation solutions. We are looking for engineers who can bring unique perspectives and innovative ideas to all areas of development and are interested in continuing to improve our ever-changing technology landscape. In this role, our mission is to bridge gaps and add value in Software Engineering Operations for our Internal and External Partners. We need engineers with "go getter" mindset. An ideal candidate is someone who works well with a cohesive team-oriented group of engineers, has a passion for developing, improving and implementing great software, enjoys solving problems in a challenging environment.

Role:

1. Flexible & Open individual with excellent verbal and written communication skills
2. Fast learner on any technology landscape
3. Work closely with Seniors, Project Managers and Architects
4. To understand the enterprise solutions, coding, requirements, provide inputs in low level designs.
5. Study upcoming technologies and identify how they can be used to improve existing development and testing frameworks & methodologies.

6. Comply with organizations processes.
7. Participate in organization level process improvement and knowledge sharing.

All About You Minimum:
