

DHRUV BHAGAT

+91 9998727137 | Vadodara | bhagatdhruv2005@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL
Core CS: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks
Frontend: React.js, HTML, CSS
Backend & APIs: Node.js, Express.js, FastAPI, RESTful APIs
Databases: MongoDB, PostgreSQL
Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, DynamoDB), Docker, Git
Software Development: SDLC, API Testing (Postman), Problem Solving, Agile Fundamentals

EXPERIENCE

AI for Sustainability Intern | *IMIB, AICTE & IBM SkillsBuild* May 2026 – June 2026

- Developed EcoSort AI, an end-to-end AI-powered waste classification platform supporting sustainable waste management through intelligent waste recognition and disposal recommendations.
- Applied software engineering principles across the SDLC, including application design, development, testing, API integration, and deployment.
- Integrated deep learning models with backend services and RESTful APIs to enable real-time AI inference and intelligent waste analytics.
- Collaborated with mentors and industry experts to develop practical solutions using Python, JavaScript, FastAPI, Express.js, and REST APIs.

PROJECTS

Smart ERP System [GitHub](#)

- Developed a business management ERP application using React, TypeScript, Express.js, and PostgreSQL, supporting HR, inventory, sales, and finance operations.
- Built RESTful APIs with JWT authentication for secure access and CRUD operations across business modules using parameterized SQL queries.
- Tech: React.js, TypeScript, Node.js, Express.js, PostgreSQL, JWT, CSS

EcoSort AI [GitHub](#)

- Developed an end-to-end waste classification platform using Python, FastAPI, React.js, and MongoDB, achieving ~94% accuracy across 27,000+ images spanning 10 waste categories.
- Designed and implemented 11 REST API endpoints supporting AI inference, analytics, and intelligent disposal recommendations.
- Tech: Python, PyTorch, FastAPI, Express.js, MongoDB, React.js, Docker

Safeguard – IoT Emergency Response Platform [GitHub](#)

- Built a Flutter-based IoT safety platform with 4-role RBAC, real-time monitoring, and emergency notifications for students, parents, wardens, and administrators.
- Designed and implemented a dual-database architecture using Firebase Realtime Database and Cloud Firestore for low-latency alerts and persistent event storage.
- Tech: Flutter, Firebase, Cloud Functions, FCM, Firestore, ESP32, TypeScript

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering CGPA: 8.71/10
Chandubhai S. Patel Institute of Technology (CSPIT), Charusat University

ACHIEVEMENTS

- Top 5 Finalist – KENEXAI 24-Hour AI Hackathon; advanced to the Top 5 teams from 650+ participants by developing an end-to-end E-Commerce Churn Intelligence System.
- Innovation Grant Recipient – Received a ₹15,000 innovation grant from iCreate, Ahmedabad after successfully pitching the Safeguard IoT Emergency Response Platform.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Developing
- NPTEL – Design and Analysis of Algorithms
- NPTEL – Data Structures and Algorithms using Java
